

Beth Billyard

Board Chair

Ms. Billyard specializes in Marketing, Business Development and Strategy. She received her undergraduate degree from Cornell University and her MBA from University of California, Irvine's School of Business. Her experience spans large corporations and small business management.

She established her career in the biotech industry, developing and marketing DNA-based tests to rapidly detect infectious diseases. Working with the American Red Cross, Ms. Billyard led a team that implemented the first molecular HIV and HCV blood-screening test.

She has also launched novel tests that detect and prevent the spread of healthcare-acquired infections in hospitals. Ms. Billyard currently enjoys teaching business and marketing to community-college students. She lives in the woods near Milford, PA with her husband, Darryl Rideout.
